

**ASPEN SPAS**

Superior Quality. *Impeccable* Innovation.

A Better Spa.

www.aspenspas.com

A Family History

It all started with an idea...

With a strong foundation in the heating and air conditioning business, Tom and Sam Bania know well the value of ***perseverance, hard work, customer service, and a job well done.***

Their years when working for their father, Lee, in HVAC exposed them to a wide variety of skills, including electrical, plumbing and carpentry work, as well as the essential and special finesse of knowing how to treat a customer and their home with respect and care along every step of the way.

Driven by the desire for a change and the pursuit of entrepreneurship, in 1991, the Banias opened up what would soon become Aspen Spas. Combining years of experience in a number of industries, they were able to create an unrivaled hot tub with ***innovative, exclusive designs and quality*** that can only be made by their family-owned and operated St. Louis company.

The immense success of Aspen Spas can be attributed to matriarch Pat Bania, who served as sales manager and built customer relationships that lasted years until her passing in 2010. The true heart and soul of Aspen Spas, Pat was a friend to everyone that walked in the door and set a precedent for future employees on how to treat customers – like family. Her spirit lives on in her sons, Tom and Sam, who use their different personalities and strengths to continue to ***run ASPEN SPAS in her honor.***

With such a rich history, you can trust that Aspen, just like your spa, is going to exceed your expectations for ***years*** to come.

*We love our
hot tub!*

*"It is very therapeutic, and a
great way to relax before work,
before dinner or before bed. We
are very happy with the size and
design of our hot tub.*

***We have owned it for five
years now and love it!"***

Kathi S. | St. Louis, MO

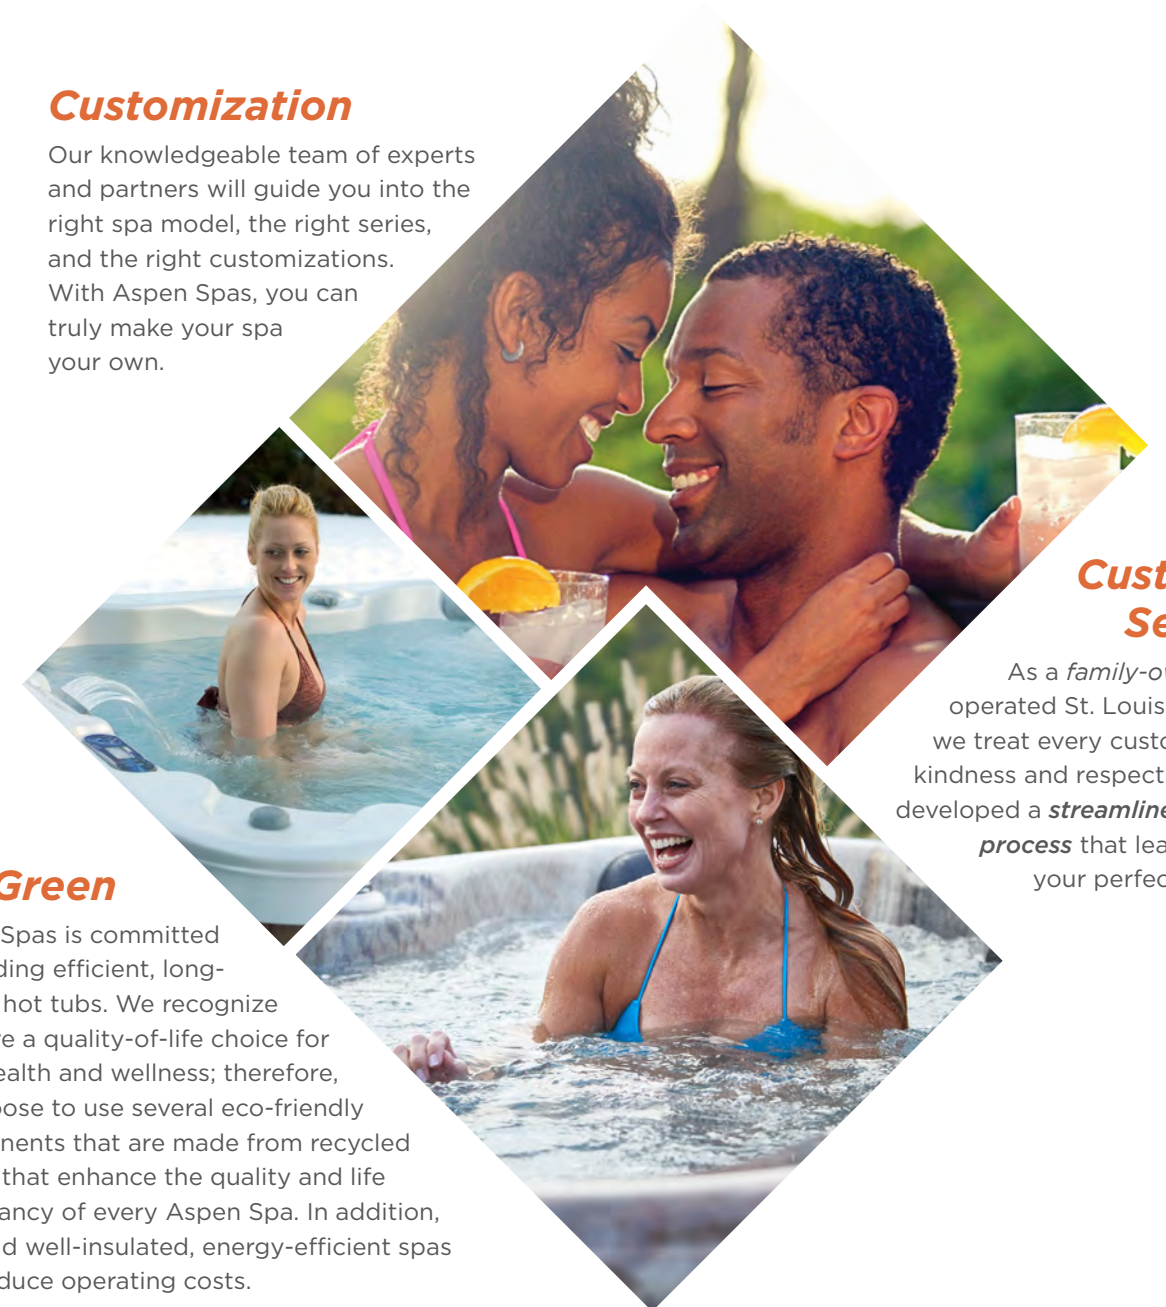

Aspen Spas Today

Since we started building Aspen Spas in 1991, we've been guided by a simple philosophy: design spas for comfort, performance, and flexibility—and build them with the best components and techniques available. We focus on design, durability, efficiency, and reliability to bring you the best spas in America, and we're continually innovating to improve your spa experience.

Today, Aspen Spas has dealers across the United States, United Kingdom, and Canada. As a spa manufacturer, we strive to have an acute understanding of the customer's therapeutic needs and relaxation desires. Due to our factory-direct showroom in St. Louis, MO, we are continually in touch with today's spa customers.

Customization

Our knowledgeable team of experts and partners will guide you into the right spa model, the right series, and the right customizations. With Aspen Spas, you can truly make your spa your own.

Customer Service

As a family-owned and operated St. Louis business, we treat every customer with kindness and respect. We have developed a ***streamlined buying process*** that leads you to your perfect hot tub.

Go Green

Aspen Spas is committed to building efficient, long-lasting hot tubs. We recognize spas are a quality-of-life choice for your health and wellness; therefore, we choose to use several eco-friendly components that are made from recycled plastic that enhance the quality and life expectancy of every Aspen Spa. In addition, we build well-insulated, energy-efficient spas that reduce operating costs.

Benefits of A Spa

While a relaxing soak in an Aspen Spa will of course enhance your hydrotherapy and thermotherapy needs, there is an added holistic approach to health and wellness that offers numerous health benefits:

Stress Relief

Stress results in headaches, muscle fatigue, and soreness. By regularly using your spa, the heat and massage from the jets **relieves tension and reduces stress.**

Minimize Arthritis Pain

The Arthritis Research Campaign recommends using spas as a way to apply heat to arthritic joints. Benefits include **muscle relaxation, decreased pain and joint stiffness,** and greater ease when performing exercise and daily activities.

Better Quality of Sleep

A study in the journal "Sleep" showed that soaking in a spa prior to bedtime will not only **help you fall asleep, but will promote more restful sleep.** Your post-spa experience will allow you to have a deeper, more relaxing sleep as your body cools.

Lowers Blood Pressure

Hydrotherapy affects various systems of the body, including the cardiovascular system. This often results in **lower blood pressure.**

Injury & Rehabilitation

The benefits of hydrotherapy after an injury are astounding. In addition to mild aches and daily stress, **hydrotherapy can actually aid recovery from a variety of painful injuries.** It can make healing easier to endure and may reduce the likelihood of "deconditioning" – a process of physical or mental decline due to inactivity.

How We Are Different Quality Build from the Shell Out

We take pride in our craftsmanship and place quality and innovation at the forefront of everything we build, so you can be confident we are building a reliable hot tub that will outperform and outlast the competition.

Unsurpassed Build Quality

E.S.C. Enviro Spa Construction:

Aspen Spas' durable spa shells and cabinets are built to withstand the elements: cold, rain, ice, heat and humidity, all while maintaining beauty and integrity for years to come.

P.I.P. Polar Insulation Package:

Our emphasis on energy efficiency is rooted in Aspen Spas' unique applications of innovative insulation materials. Therefore, every Aspen Spa is built to maintain warm, therapeutic water while keeping your energy bills low.

E.P.P.S. Everlast Performance Plumbing System:

A more reliable plumbing system made up of the latest components and building techniques, which perform better and last longer.

If you want the *best*,
choose an **ASPEN SPA**

The Building of a Spa

What makes it an *Aspen Spa*?

At Aspen Spas, we believe that it's not only important to use the best components when building a spa, but also to utilize the best processes and techniques. Our spa mold designs are handcrafted in house, backed by years of research and development, and reinforced by customer feedback. We are confident that our spas are not only more comfortable, but more durable, reliable, and efficient.

Smarter Design

An Aspen Spa starts with an unsurpassed design concept; **one seat cannot be everything to every body.** With different seats, seat heights, jet sizes, and jet patterns, your Aspen Spa is crafted to meet your personal needs for relaxation and comfort.

A Better Process, *A Better Spa*

We are passionate about our spas.
Take a closer look at our building process...

Enviro Spa Construction:

Every Aspen Spa is a quality-built hot tub: from the shell to the cabinet to the base, they all combine for a better-built spa.

Lucite Optix-XL Acrylic
Exclusive 7-Layer Reinforcement

Maintenance-Free Cabinet
Real Wood Look and Feel

ABS Pan Spa Base
100% Recycled Plastic

Polar Insulation Package:

Aspen Spas is committed to building **energy-efficient spas** through our unique P.I.P., which addresses insulating from the cold and retaining the spa's heat.

- Spa Shell Insulation** | Hybrid Cell Natural-Therm Zero
- Cabinet/Door Insulation** | Prodex Total 5m Plus
- Spa Base Insulation** | Prodex Total 5m Plus
- Spa Lip Insulation** | 2 lb Foam Ring
- Spa Cover** | 4" x 2" Insulated Hard Cover

Everlast Performance Plumbing System:

The combination of utilizing **SQR Compression Jets by CMP** plumbed with **2" schedule 40 Pipe, 90° Sweep Elbows, and 3/4" Shurgrip Flex Hose** not only perform better and deliver more therapeutic pressure, but it is also a more reliable and dependable plumbing technique.

- Jet Bodies and Valves**
No-Leak Compression Grommet Seal
- Main Supply Lines**
Schedule 40 Hard and Flex Pipe with 2" Sweep 90s
- Jet Plumbing**
2" Manifold System with 3/4" Schedule 40 Shurgrip Hose

Jet Collection

Ultimate *Relaxation & Comfort*

Cutting-Edge Spa Designed for Every Body

Aspen Spas are designed with the concept of “**one seat cannot be everything to every body.**” Therefore, seating is one of the more important factors you’ll want to keep in mind when choosing your spa. While our *exclusive* seating options vary depending on the spa model you choose...

Aspen Spas are a family of spas; seating is replicated across various sizes and models.

Open Love Seat

Slightly more vertical than the captain’s chair, this seating option is the perfect choice for when you want to sit up close and personal. It also allows you to swivel from side to side to massage your back, shoulders, arms, and sides.

Footwell

All Aspen Spas are designed with deep wide-open footwells, allowing for a more natural sitting position and enough comfortable room for multiple spa users.

Entry Steps

Built for you to safely enter your spa.

Bench Seat

Placing you higher in the water, the bench seat works perfectly as a step and a cool-down seat. It also features pinpoint jets which provide an intense, direct massage to the lower back.

Captain’s Chair

This deep, upright bucket seat surrounds you with the ultimate hydro-massage focused on your neck, back, hamstrings, calves, and feet. It also features arm rests with pinpoint jets for the hands and wrists.

No-Float Lounger

Exclusively designed to allow people of all heights to recline and relax, the no-float lounger is unlike anything else in the industry. The unique no-float design keeps you in your seat while enjoying a hydro-massage for neck, back, calves, and feet.

Advantage of a Thinner Spa Lip

The way we design our spas reduces the size of the perimeter spa lip, allowing for larger seats, more comfortable ergonomics, and more interior space.

Discover *Your Aspen.*

Ready to create your perfect spa?

Every person is unique, and so is every Aspen Spa. We want to ensure that you get a spa that is made specifically to meet your needs, so we have developed a simplified buying process.

STEP 1

Choose the uniquely designed spa mold that is right for you by answering these questions:

- How many people do you want your spa to accommodate?
- How much space do you have for your spa?
- Do you prefer a Lounger and Captain's Chair or 2 Captain's Chairs?

STEP 2

What features are you looking for in your spa? Most Aspen Spas are made in three series – ES, GS, and VS. Your choice in which series reflects what you may want from your spa without ever having to compromise on quality.

STEP 3

Fully customize your Aspen Spa by choosing your spa shell and cabinet colors, select upgrades you desire, and enhance your spa with the right accessories.

Spa *Models & Sizes*

Find the right spa for YOUR lifestyle.

Which Series *Fits You?*

Once you have chosen the model you like, Aspen Spas offers three distinct spa series, allowing you to select the features that meet your every desire.

Different features are standard in each series and various upgrades are available, depending on the spa model.

ES Extreme Series

Our top-of-the-line spa offering the total-therapy package and amenity options

ES spas deliver the ultimate spa experience—unsurpassed therapeutic massage, a soothing 3-zone Chromatherapy LED lighting system, touchscreen controls, and powerful volcano foot jets. Enjoy luxurious, indulgent relaxation of the muscles and the mind with the benefits of the Extreme Series.

- Up to 4 Pumps
- Up to 70 Stainless & Graphite Halo Jets
- 2 Volcano Jets at 70 GPM
- Touchscreen Topside Control
- in.touch 2: Wi-Fi Enabled Mobile Remote
- Full-Chromatherapy with 3-Zone Adjustable LED Lighting
- Illuminated Controls and Pillows
- Illuminated Water Feature
- Sanitizing MicroCell Ozonator
- Up to 100 sq ft Microban® Filter
- Full P.I.P.

**Features depend on spa model*

GS Great Series

A great therapeutic spa featuring comforting touches of luxury

GS spas were created to deliver the ideal combination of invigorating massage and innovative spa features, including stainless and graphite halo jets, a water feature, and Mini-Chromatherapy LED lighting.

- Up to 2 Pumps
- Up to 50 Stainless and Graphite Halo Jets
- Mini-Chromatherapy LED Lighting
- Water Feature
- Sanitizing MicroCell Ozonator
- Up to 100 sq ft Microban® Filter
- Partial P.I.P.

**Features depend on spa model*

VS Value Series

All the most important hydrotherapy options at an excellent value

VS spas provide relaxation, comfort and are perfect for spending time with family, entertaining friends, or simply reconnecting with your inner self. These spas offer up to 32 massaging jets and sparkling clear water. Choose your VS spa as a 110v model with a 15' GFCI cord or in a 220v model.

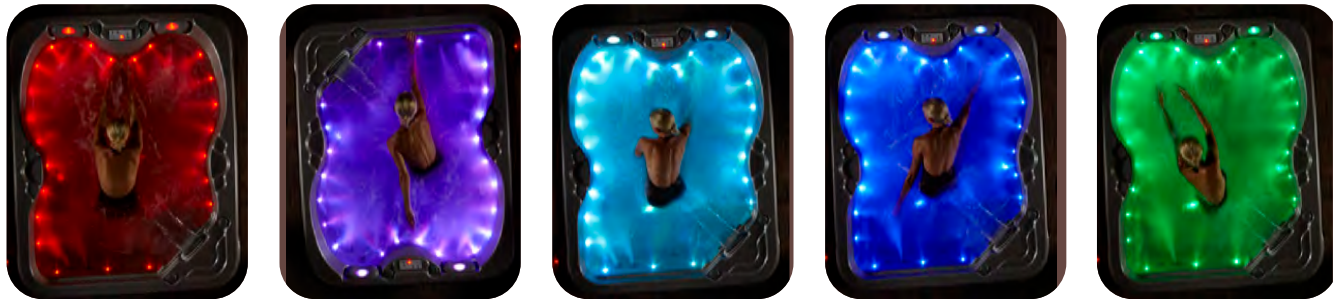

- 1 Pump
- Up to 32 Stainless and Graphite Halo Jets
- LED Mood Light
- 2 Roman Fountains
- Sanitizing MicroCell Ozonator
- 50 sq ft Filter
- 110v or 220v, Convertible Spa Pack
- Partial P.I.P.

**Features depend on spa model*

Make Your Spa *Your Own*

Enhance Your Spa Experience

Once you have picked your model and determined which series is the best fit, you're able to truly customize your spa, making it one-of-a-kind based on **your** needs and **your** preferences.

LED Lighting

Aspen Spas' Full-Chromatherapy LED lighting with 3 zones, Mini-Chromatherapy, or LED mood light all offer varying displays of solid colors, to blinking and fading effects to set the right mood.

Volcano Jets

At a rate of 70 gallons per minute, volcano jets provide the ultimate deep tissue massage; typically used for hamstring, calf, and foot massage.

24-Hour Circulation Pump

Standard on most ES spas, but a popular upgrade on GS and VS spas. A 24-hour circulation pump is a low flow, energy-efficient pump that provides crystal clear water at a lower operating cost.

k.1000 Touchscreen Controls

The latest technology in spas, this interactive control system at your fingertips allows for seamless interaction with your spa, therapy pumps, lighting systems, and filtering options.

Bluetooth Audio

Upgrade your Aspen Spa by adding a Bluetooth audio system that can be controlled with a simple finger tap on your smartphone and/or the topside touch controls. Unwind with your favorite music with incredible sound from your waterproof speakers.

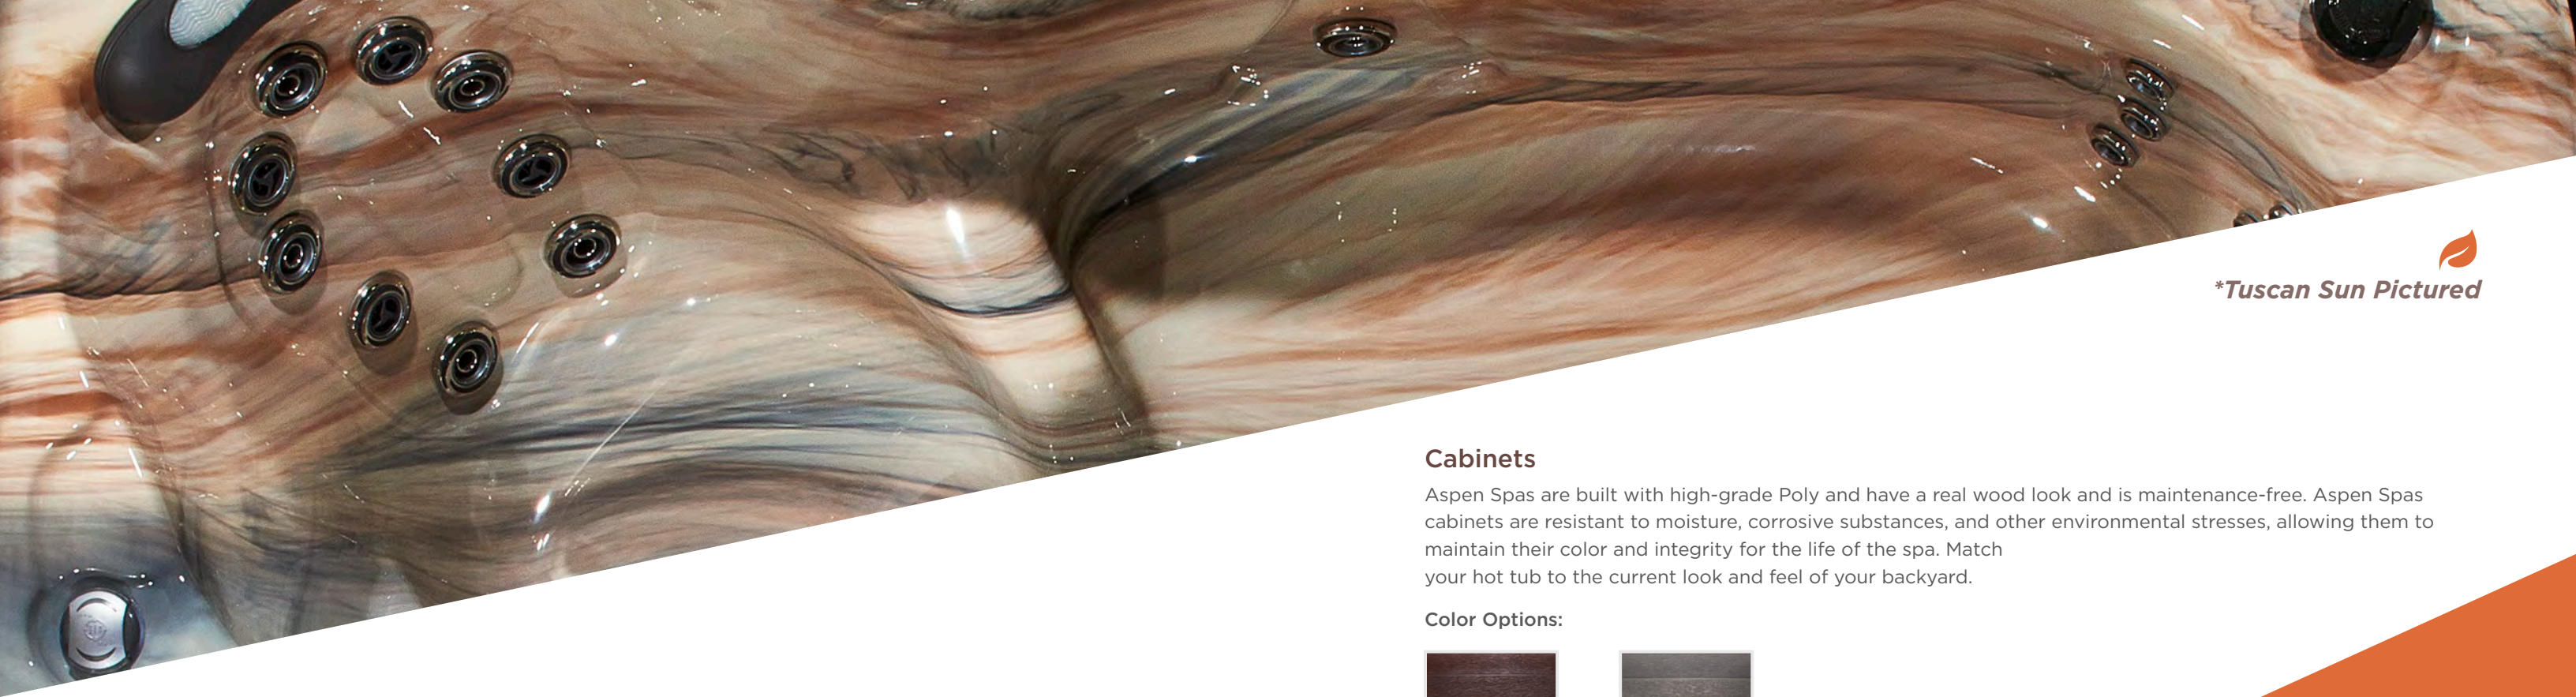

**Features depend on spa model*

in.touch 2

Be in.touch with your spa from anywhere! Control your spa directly from your smartphone. From changing the temperature to turning on your lights, it's all available within the Gecko app.

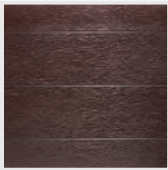

**Tuscan Sun Pictured*

Cabinets

Aspen Spas are built with high-grade Poly and have a real wood look and is maintenance-free. Aspen Spas cabinets are resistant to moisture, corrosive substances, and other environmental stresses, allowing them to maintain their color and integrity for the life of the spa. Match your hot tub to the current look and feel of your backyard.

Color Options:

Espresso

Graphite Grey

Striking Colors to *Personalize Your Spa*

Once you've chosen a spa size, model, series, and upgrades, now it's time to make your spa your own with a variety of shell, cabinet, and cover color options.

Spa Shell Colors

Aspen Spas allows you to personalize your spa with seven luxurious acrylic color options. Our spas are crafted using only genuine Lucite Optix-XL – a glossy, rich, and lustrous material that withstands the test of time, ensuring that your spa looks beautiful for years to come.

Pinnacle

ES | GS

The Pinnacle spares no luxuries - it is truly everything you're looking for in a spa.

This 8' spa is ideal for every occasion. There is room for six, but the best seats are the no-float lounge, the captain's chair and the open love seat. The Pinnacle is large enough for entertaining, with a spacious footwell, yet its open love seat lends perfectly to intimate conversations in the glow of the Chromatherapy LED lighting.

The *Alpine Spa's* unique size puts it in the large spa family in that it can fit seven people, but it has a smaller footprint, taking up less room on your patio.

The 82" x 92" spa is designed with a universal lounger and three captain's chairs, each at a different height and with different jet patterns, targeting various parts of your back and shoulders. While the incredibly spacious footwell allows room for six to seven sets of feet, it's also perfect for stretching and exercising in the warmth of healing waters.

Monarch

ES | GS | VS

The Monarch is truly a revolutionary spa, and one like no other. By repositioning the two deep captain’s chairs, the footwell is opened up, making it massive. This spa has enough room for five bathers, while the thinner spa lip creates a more spacious interior for all.

Bottom line, for a 7’ hot tub, the Monarch not only feels huge, it IS huge. So, gather your friends or a loved one and prepare for total relaxation.

Eldorado

ES | GS | VS

The Eldorado was crafted from the spacious mold of the Monarch spa. It has the same deep, comfortable captain’s chair, but what distinguishes the Eldorado is the no-float lounger.

Not only does this 7’ spa allow you to put your feet up, but there are also jets for the entire body: neck, back, hamstrings, calves, and the feet. It’s truly all-inclusive and totally relaxing. Unique styling and seat positioning in the Eldorado allows ample room for five adults.

Quattro

ES | GS | VS

The Quattro is perfect for those looking for a smaller hot tub. Its deep no-float lounger and incredible captain’s chair provide exceptional comfort and therapy.

This space saving spa is 5’6” x 7’ and has room for four adults to achieve ultimate relaxation in the warmth and power of the jets. Its size makes it ideal for a solo soak or for small gatherings. It’s also ideal for compact yards and patios.

Colorado

ES | GS | VS

The Colorado is an exceptional spa, smaller in size, but roomy enough to socialize with your family..

Originating from the 7’ Monarch Spa, the Colorado has a smaller footprint while keeping the primary focus on the 2 Captain’s Chairs. The Captain’s chairs are different heights/depths, and each chair has a unique jet pattern to target different parts of the back and neck, along with a foot jet for both bathers.

S.W.I.M. – *Superior Water In Motion*

An Entirely New Swim Spa Experience

Aspen Spas developed its S.W.I.M. Series Swim Spas with a fresh approach...

Swim

Swimming, known to be one of the best workouts, can now be on-demand at your convenience in the comforts of your backyard.

Soak

Soak up the benefits of hydrotherapy to wind down the day.

Play

Create a new playground for the entire family.

Swim in place, for as long as you want, as hard as you want. Designed with a longer, wider swim lane and equipped with 3 – XP3E Swim Pumps powering 6-Swim-Power Turbo Jets (110 gallons per minute each), the S.W.I.M. 16 E is certain to deliver the perfect aquatic workout for you and your family. The jets are divided into 3 zones and the k.1000 Touchscreen has 6 built-in speeds that can be programmed to create a H.I.I.T. (High-Intensity Interval Training) swim workout specifically designed for you.

The therapeutic massage that comes from a *Soak* in an Aspen Spa will not only induce pure relaxation, but will heal the body and give you a better, deeper sleep. The 2 Deep Captain's Chairs and bench seat are equipped with up to 31 Spectrum Series Hydrotherapy Jets. To enhance the experience, all Aspen S.W.I.M. Spas come standard with Chromatherapy LED Lighting and 6 Roman Fountains.

Whether the kids or grandkids are looking to *Play* or you are simply looking to float and soak up the sun, the S.W.I.M. design is ideal for all. Dual entry 3-tier steps and a spacious interior make getting in and out safer and there is plenty of room to splash around. Lighten your mood with the Bluetooth audio system with pop up speakers and a subwoofer (standard in E Series).

Built Smarter
So You Can
Work Out
Harder

Innovation in Fitness

S.W.I.M. Spas from Aspen Spas are Built to Last.

The shell and plumbing construction follow the same superior build process as all Aspen Spas, but the cabinet structure has evolved. Instead of an ABS pan, we use a fiberglass pan with fiberglass structural corners.

Enviro Spa Construction:

- Acrylic Spa Shell
Lucite Optix-XL with
7 Layer Reinforcement
- Synthetic Spa Cabinet
Real Wood Look and Feel
- Cabinet Base
Full Fiberglass Base/Pan
- Cabinet Structure
Fiberglass Structural Corners

Everlast Performance Plumbing System:

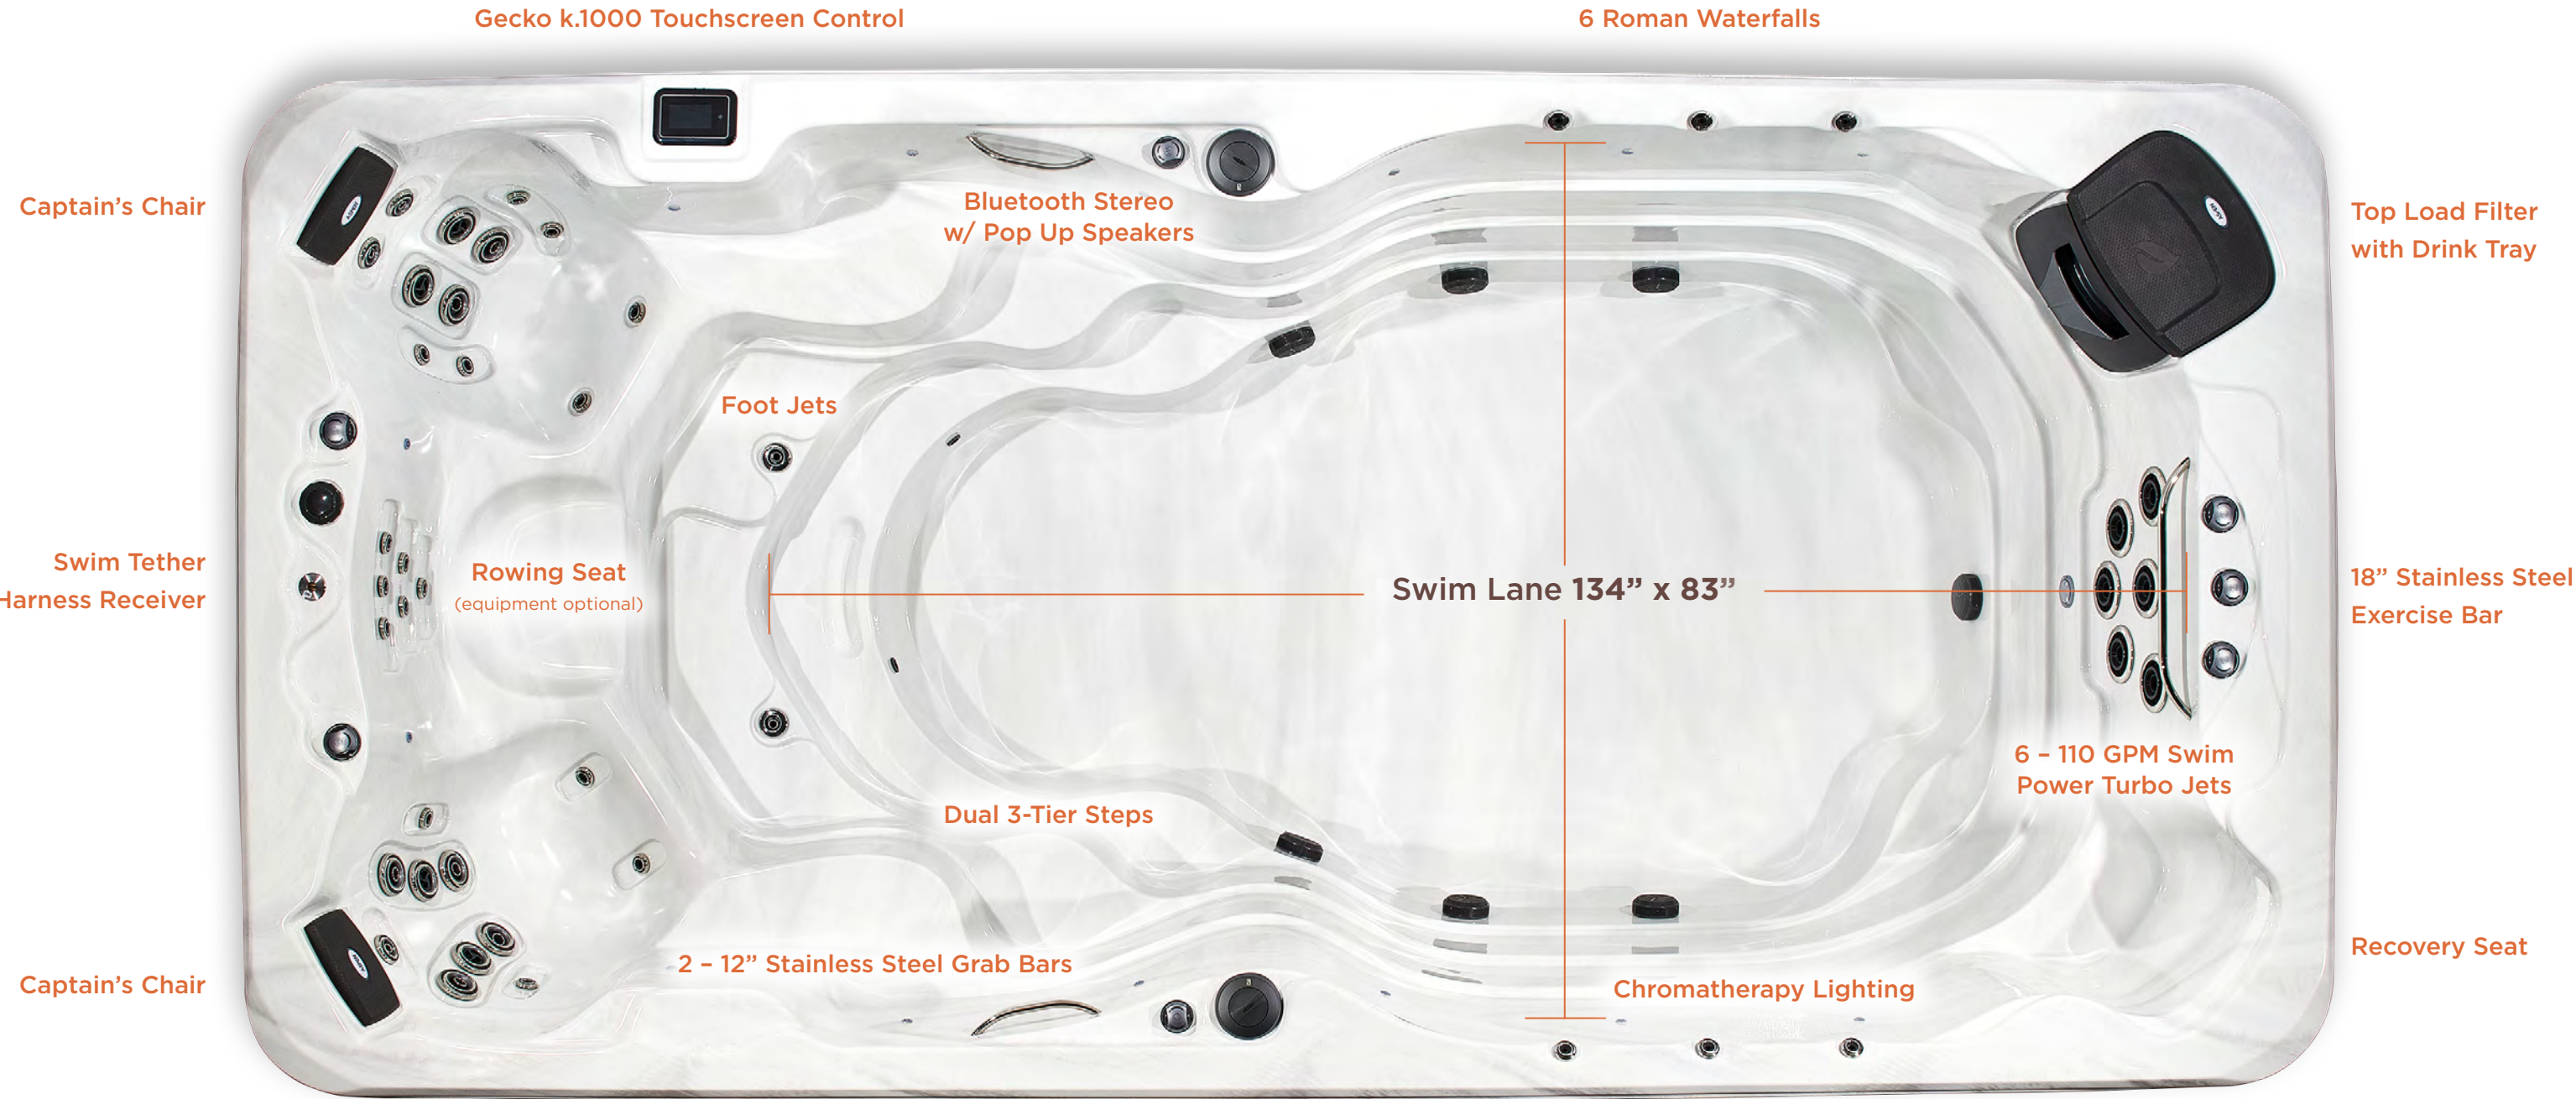

- Jet Bodies and Valves
No-Leak Compression Grommet Seal
- Main Supply Lines
Schedule 40 Pipe with
2" Sweep Elbows
- Jets Plumbing
2" Manifold System with 3/4"
Schedule 40 Shurgrip Hose

Polar Insulation Package:

- Spa Shell Insulation
Hybrid Cell Natural-Therm Zero
- Cabinet/Door Insulation
Prodex Total 5M Plus
- Spa Base Insulation
Prodex Total 5M Plus
- Spa Lip Insulation
2 lb Foam Ring
- Spa Cover
4" x 2" Insulated Hard Cover,
2 Bi-Fold Covers

Aspen S.W.I.M. 16-E

Better by *Design* 

Exercise

Stay healthy without the physical strain on your body

Relaxation

Enjoy the benefits of a pool without taking up space

Therapy

Hydrotherapy massage after working out

Well-Being

Total body and mind cleansing for unwinding

Finally a Better Swim Spa

Planning for your *Aspen Spa?*

Spa Location & Installation Suggestions

**** These are generic recommendations, please consult your Aspen Spa Dealer for further assistance or specifics to your local codes****

Location of your *Aspen Spa*

Safety

Do NOT place your spa underneath overhead power lines.

Foundation

Because of the combined weight of the hot tub, water, and users, it is extremely important that the base you have chosen for your new spa is smooth, flat, level, and capable of supporting the weight. If the spa is placed on a surface which does not meet these requirements, damage to the skirt and/or spa shell may result. Damage caused by improper support is not covered under the warranty. It is the responsibility of the owner to always ensure the integrity of the support.

Access To The Entire Spa

Spa recessed into a floor, deck or in-ground, must be installed in such a manner to permit access the spa equipment and lighting for servicing. Please be sure that there are no obstructions which would prevent removal of the cabinet side panels, especially on the side(s) with the spa pumps and pack.

Outdoor Installations

When selecting the most ideal outside location for your spa, please consider the following: The proximity of the spa to your house, especially in cold weather. A clean path that minimizes debris tracked into the spa. A surrounding environment that provides shelter and privacy while considering view obstructions and additional maintenance.

Indoor Installations

When considering an indoor spa placement, there are three major issues to think about.

Access: How will the spa get to the desired location?

Drainage: Spas will always have excessive water spillage and it is extremely important to have proper drainage. Areas around and under your spa can become wet or moist. Take proper provisions to protect all structures, furniture, and carpeting that may be affected.

Ventilation: Proper ventilation is important to avoid mold and mildew damage from moist, heated air.

Electrical Wiring Instructions For 220v Spas

Please read the following wiring requirements. Aspen Spas would like to ensure customers and electricians understand what is expected before your spa arrives.

Inside Your Home

Your main panel should have a 50amp double pole circuit breaker that can be dedicated to the spa.

Outside Your Home

The spa requires a 50amp double pole Ground Fault Circuit Interrupter (GFCI) disconnect.

The GFCI must be the proper distance away from the spa and located according to local electrical codes. The spa requires four (4) wires from the main panel to the GFCI disconnect and from the GFCI to the spa, 2 hot wires, 1 neutral and 1 ground. The total distance will determine the wire size, but #8 at a minimum, potentially #6 is required and the wire must be encased in a non-metallic, watertight conduit. Once the wire reaches the spa, leave an additional 10' of wire, which can be routed through the cabinet to the spa equipment.

These are general requirements and may not meet local codes, which vary by municipality.
